CASE FILE KHERSON · 1–5 NOVEMBER 2026

KHERSON, 2 NOVEMBER: A HOSPITAL HIT NINE HOURS AFTER THE TRUCE ENDED

The local truce around occupied Oleshky, the longest pause in fighting since 2022, ended at 22:59 Kyiv time on 1 November 2026 after Russia refused an offer to extend it, a senior Ukrainian official said. Less than nine hours later, at about 07:40, a drone hit a medical facility in central Kherson. Twenty minutes after that, a drone hit a car and injured two older residents.

BOTTOM LINE

Six days of quiet, then a drone at a clinic. The truce held from 03:00 on 27 October to 22:59 on 1 November; at about 07:40 on 2 November a drone damaged rooms, windows and doors of a medical facility in central Kherson. No one was hurt, preliminarily — staff were in the shelter (Kherson city military administration; facility director via Kyiv Post).

No renewal. Russia refused a Ukrainian offer to extend the truce, a senior official in the Ukrainian presidency told AFP; the Kremlin ruled out similar missions for now (D. Peskov, 2 Nov, via AFP, Ukrainska Pravda and the Kyiv Independent).

A pattern the UN has named. The UN Commission of Inquiry found in 2025 that Russian drone attacks on civilians in Kherson amount to the crime against humanity of murder, and that drones struck ambulances on their way to the wounded.

LEGAL QUALIFICATION IN THREE LAYERS

DRONE HIT A MEDICAL FACILITY IN CENTRAL KHERSON ON 2 NOVEMBER — UKRAINIAN AUTHORITIES REPORT (B)

DRONE ATTACKS ON CIVILIANS IN KHERSON — CRIMES AGAINST HUMANITY (UN COMMISSION OF INQUIRY, 2025)

UKRAINE: RUSSIA USED THE HUMANITARIAN PAUSE TO IMPROVE ITS POSITIONS — POSITION

Established. The UN Commission of Inquiry found in May 2025 that Russian drone attacks on civilians in Kherson amount to the crime against humanity of murder and the war crime of attacking civilians, and in October 2025 the crime against humanity of forcible transfer. For 2 November, Ukrainian authorities report that a drone hit a medical facility in central Kherson at about 07:40 and that a drone injured two people in a car at about 08:00; no mandated body has verified either yet. **Pattern.** Medical facilities in Kherson were hit by drones on 14 April and 13 July 2026. **Position.** Ukraine's General Staff says Russia used the humanitarian pause to improve its positions.

WHAT WE ASK

Back humanitarian pauses around Oleshky that are monitored by the UN and the ICRC, with a renewable and verifiable corridor for the people who remain; and ask Russia to keep medical facilities out of every strike plan (Geneva Convention IV, art. 18).

WHAT IS ON THE RECORD SO FAR

Kherson city military administration: at about 07:40 a drone attacked central Kherson and hit a medical facility; several rooms were damaged and windows and interior doors smashed (Ya. Shanko, 2 Nov).

The facility's director said the three-storey building's facade, offices, computers and furniture were damaged and that all staff were in the shelter (via Suspilne, cited by Kyiv Post, 2 Nov).

The city administration warned the same day that Russian forces were resuming "free hunting" of vehicles with fibre-optic, FPV, Mavic and Molniya drones (via UNITED24 Media, 2 Nov).

WHO WAS HARMED

Medical facility: no casualties, preliminarily (Kherson city military administration, 2 Nov).

Korabelnyi district, about 08:00: a woman of 62 and a man of 73 injured in their car and taken to hospital (Kherson regional administration, via AFP, 2 Nov).

Kherson region, 24 hours to 06:00 Kyiv time on 2 Nov: 16 settlements hit by artillery or air attacks (governor O. Prokudin, via Reuters).

Kherson region, past day to 5 Nov: 1 killed and 3 injured; 10 others injured in the preceding days (governor O. Prokudin and regional military administration, via the Kyiv Independent).

CASE FILE FACT-CHECK · WHAT RUSSIA SAYS

"A COMPLETELY NORMAL PRACTICE"

Asked about Ukraine's charge that Russian forces used the humanitarian pause to fortify their positions, the Kremlin did not deny it and called it normal practice. The claim is tested here against what is known.

UKRAINE EVIDENCE HUB
VERIFIED RECORD
NOV 2026

DMITRY PESKOV · KREMLIN SPOKESMAN, CONFERENCE CALL, 2 NOV 2026

“This is a completely normal practice in such situations.”

AFP, 2 Nov 2026, via Malay Mail (Reuters renders it: "This is standard practice in such situations.")

DEFLECTION — THE PAUSE WAS FOR CIVILIANS, AND RUSSIA DECLINED TO RENEW IT

Ukraine's General Staff said Russian forces used the pause to rotate units, fortify positions, expand anti-drone measures on roads and bring in ammunition (2 Nov). Russia refused an offer to extend the truce (senior Ukrainian official, via AFP). Less than nine hours after it ended, a drone hit a medical facility in central Kherson (Kherson city military administration).

What the claim concedes: Not a denial: asked about Russian forces, Peskov said he was "not familiar with the specifics" and referred questions to the Ministry of Defence, while saying the Ukrainian side "also" regrouped.

FAIR TO SAY

Neither side reported violations during the six days, and Ukraine's Ombudsman said both sides honoured their commitments (via Gordon, 2 Nov).

Peskov said he was not familiar with the specifics regarding Russian forces and referred questions to the Ministry of Defence (via Reuters).

Whether either army regrouped has not been established by any independent body; the account of Russian activity is the General Staff's.

No independent body has yet attributed the drone that hit the Kherson medical facility.

CASE FILE THE LAW AND WHAT WE ASK

MEDICAL FACILITIES ARE PROTECTED; PAUSES SHOULD BE RENEWABLE

Civilian hospitals may not be attacked in any circumstances; protection ends only if they are used to commit acts harmful to the enemy, and only after a warning and a time limit. A pause that lets civilians out works only if it can be renewed and checked.

UKRAINE EVIDENCE HUB
VERIFIED RECORD
NOV 2026

ESTABLISHED — BY BODIES WITH A MANDATE

Commission of Inquiry (28 May 2025): Russian drone attacks on civilians in Kherson amount to the crime against humanity of murder and the war crime of intentionally directing attacks against civilians; ambulances were targeted and struck by drones. A/80/497 (Oct 2025): the crime against humanity of forcible transfer (para. 54).

Ukrainian authorities report that at about 07:40 on 2 November 2026 a drone hit a medical facility in central Kherson, with no casualties preliminarily, and that at about 08:00 a drone injured two people in a car (Kherson city military administration; Kherson regional administration). No mandated body has verified these strikes as of 5 Nov 2026.

PATTERN — WHAT THE RECORD SHOWS

Kherson, 14 Apr 2026: a Molniya-type drone hit a hospital in the Tsentralnyi district; four staff injured (Kherson city military administration, via Ukrinform).

Kherson, 13 Jul 2026: an FPV drone hit a medical facility; at least 11 injured, seven of them staff (Kherson regional military administration, via Slovo i Dilo).

Commission of Inquiry (22 Sep 2025): drones struck ambulances and other emergency services, preventing them from reaching victims.

POSITION — UKRAINE'S QUALIFICATION

Ukraine's General Staff: "the enemy used the humanitarian pause" to fortify its positions (2 Nov 2026).

Kherson city military administration: Russian forces resumed "free hunting" of vehicles after the truce (2 Nov 2026).

THE RULES THAT APPLY

Geneva Convention IV arts. 18–19 and Additional Protocol I art. 12: civilian hospitals and medical units may not be attacked; protection ends only after a warning and a time limit.

Additional Protocol I arts. 51(4)–(5) and 57: indiscriminate attacks are prohibited and all feasible precautions must be taken.

Rome Statute art. 8(2)(b)(ix): intentionally directing attacks against hospitals — a war crime.

Geneva Convention IV art. 17: parties shall endeavour to conclude local agreements to remove the wounded, sick, elderly and children from besieged or encircled areas.

WHAT WE DO NOT KNOW

Which medical facility was hit, whether patients were inside, and the unit that flew the drone.

How many people left Oleshky, and to where; neither Kyiv nor Moscow has published a count.

Why Russia declined to extend the truce; the Kremlin has not addressed the offer publicly.

Whether WHO and HRMMU will verify the strike.

WHAT WE ASK

Cite the strike — with its source. At about 07:40 on 2 November 2026, less than nine hours after the Oleshky truce ended, a drone hit a medical facility in central Kherson, and at about 08:00 a drone injured two people in a car (Kherson city military administration; Kherson regional administration).

Make the pause renewable and verifiable. Support humanitarian pauses around Oleshky monitored by the UN and the ICRC, with a renewable, verifiable corridor for the people who remain.

Keep medical facilities out of strike plans. Ask Russia to stop strikes on medical facilities, which Geneva Convention IV, art. 18, protects in all circumstances.

Ask the UN to verify. Ask WHO to record the 2 November strike as an attack on health care, and HRMMU to verify the casualties in Kherson since the truce ended.
