

VINNYTSIA: KALIBRS ON A CITY CENTRE AT ELEVEN IN THE MORNING

Kalibr cruise missiles launched from the Black Sea hit the centre of Vinnytsia — 400 km from the front — at about 10:45 on a Thursday: the Officers' House concert hall, a clinic, an office block and a car park. 28–29 civilians died, three of them children, among them four-year-old Liza Dmytriieva, just out of a speech-therapy session. Russia said it had struck a meeting of the Air Force command with foreign arms suppliers and 'the participants were eliminated'.

BOTTOM LINE

A city centre, not a command post. The missiles hit a Soviet-era concert hall used for cultural events, a private clinic, offices and a car park on a working morning. The dead and injured were patients, staff, office workers and pedestrians; no Air Force commanders and no foreign arms suppliers were among them, and Russia has named none.

Russia admitted the strike within a day. The MoD's statement of 15 July 2022 — Kalibr missiles, the Officers' House, a 'meeting' — concedes the launch, the target and the intent. It has never substantiated the meeting.

Ukraine has charged the admiral who gave the order. The SBU served notice of suspicion on Admiral Igor Osipov, Black Sea Fleet commander in July 2022, on 12 July 2023 for a war crime combined with premeditated murder.

LEGAL QUALIFICATION IN THREE LAYERS

Established. The facts are not in dispute: Russia's MoD confirmed on 15 July 2022 that Kalibr missiles struck the Officers' House; the UN Secretary-General recorded at least 22 killed including three children and condemned attacks on civilians; Ukrainian investigators documented 29 dead and 154 injured. The hub has located no case-specific UN legal finding. **Pattern.** Kalibr and Kh-22 strikes on cities far from the front in June–July 2022, each followed by a Russian claim of a military target that no evidence supports. **Position.** Ukraine qualifies the strike as a war crime combined with premeditated murder (Arts. 28(2), 438(2) CCU); Admiral Osipov notified of suspicion (12 Jul 2023).

WHAT WE ASK

Ask the Commission of Inquiry and HRMMU to record Vinnytsia explicitly. Designate Admiral Igor Osipov with Vinnytsia as a ground where not yet listed — the UK listed him on 15 Mar 2022 for the aggression generally. Share Black Sea naval tracking for 14 July 2022 to fix the launch platform. Quote 'the participants were eliminated' beside the list of the dead.

A CONCERT HALL, A CLINIC, AN OFFICE BLOCK AND A CAR PARK

Vinnytsia had been one of the safe cities of the war — a destination for the displaced, 400 km from the front. The Officers' House is a 1930s concert and conference venue on the central square, the Neuromed clinic treated children with developmental conditions, and at a quarter to eleven on a Thursday the pavements between them were full.

WHAT THE INVESTIGATIONS ESTABLISHED

General Staff and Air Force (14 Jul 2022): Kalibr cruise missiles fired from the Black Sea; three hit the centre and two were shot down near Rakhny. The launch platform is given as a submarine (2022), a warship near Cape Fiolent (SBU, 2023) and a small missile ship near Sevastopol (PGO, 2025).

The Russian MoD confirmed the strike, the weapon and the building, and asserted a meeting of the Air Force command with foreign arms suppliers. It has produced no name, document or image of such a meeting.

WHO THE DEAD WERE

Twenty-nine civilians on the final count: patients and staff of the clinic, office workers, shoppers, drivers in the car park. Three were children, among them Liza Dmytriieva, 4, killed beside her pram; her mother Iryna was seriously injured.

154 injured on the SBU's count (202 in 2022 reporting). 35 residential buildings and 23 businesses damaged, some 50 cars burned.

FROM THE FLEET COMMANDER TO A SHIP NEAR SEVASTOPOL

Ukraine's case runs from the commander of the Black Sea Fleet, who ordered the launch, to the commander of the ship that fired. The fleet commander of July 2022 is charged; the ship's commander is not named in public.

CHAIN OF RESPONSIBILITY

The sequence in the Ukrainian case: the Black Sea Fleet commander (Osipov) orders the strike → the order goes to the commander of the launching ship near Sevastopol → four Kalibrs are launched from the Black Sea → three reach the city centre at about 10:45, two are shot down near Rakhny (Air Force) — the arithmetic of four ordered and five launched is unresolved and shown as such.

A Kalibr strike in central Ukraine is a fleet-level decision; the Officers' House was hit with a weapon accurate enough to hit it, which is why the MoD's statement about the building is an admission rather than an excuse.

THE RUSSIAN STATE'S OWN ACTS

Russia's MoD admitted the strike, the weapon and the building within a day and has never named an officer or 'arms supplier' said to have been at the meeting. RT's editor-in-chief added that the building housed 'Nazis'.

Russia has not addressed the deaths of three children, the clinic or the car park; its account mentions only the Officers' House.

'THE PARTICIPANTS WERE ELIMINATED' — AND THE DEAD WERE NAMED

Russia's account of Vinnytsia is one sentence long: Kalibrs hit the Officers' House during a meeting of the Air Force command with foreign arms suppliers, and the participants were eliminated. Every name on the list of the dead answers it.

OCT 2026

MINISTRY OF DEFENCE OF THE RUSSIAN FEDERATION · DAILY BRIEFING, MOSCOW, 15 JUL 2022 (RELAYED BY RIA NOVOSTI; TRANSLATION VIA NOVAYA GAZETA EUROPE / UKRAINIAN NEWS)

“Yesterday, high-precision Kalibr missiles attacked the garrison house of officers in Vinnytsia; at that moment a meeting of the command of the Ukrainian Air Force with representatives of foreign arms suppliers was held ... As a result of the strike, the participants in the meeting were eliminated.”

RIA Novosti, 15 Jul 2022; Novaya Gazeta Europe; Ukrainian News; The Moscow Times

NO SUCH MEETING, NO SUCH PARTICIPANTS

The dead are 29 civilians including three children; none was an Air Force officer or a foreign national, and Russia has never named one. The missiles also hit a clinic, an office block and a car park, which the statement omits.

What the claim concedes: The launch, the weapon (Kalibr), the aim point (the Officers' House) and the intent to kill everyone inside it — the complete actus reus of the Ukrainian charge.

MARGARITA SIMONYAN · EDITOR-IN-CHIEF, RT (STATE MEDIA) · TELEGRAM, 14 JUL 2022

“An Officer House which was a temporary accommodation point of the 'Nazis'.”

Ukrainska Pravda, 14 Jul 2022; EUvsDisinfo

NOT EVEN THE MOD'S VERSION

The MoD claimed a meeting of Air Force officers and arms suppliers; the state broadcaster's head claimed 'Nazis'. Neither named anyone. The people on the casualty list were patients, staff, office workers and pedestrians.

What the claim concedes: That the building was the intended target.

PRO-KREMLIN MEDIA (VERIDICA CASE STUDY) · JUL 2022

“With a single missile Russia killed at least 15 Ukrainian generals at Vinnytsia, putting a stop to the Ukrainian counter-offensive in Donbas. (narrative as documented by Veridica)”

Veridica, Jul 2022

NO GENERAL HAS BEEN NAMED IN FOUR YEARS

No funeral, name or photograph of any general has ever been produced; the 29 dead are identified civilians. The claim has no source in any Russian official statement.

What the claim concedes: Nothing; it illustrates the escalation of the target story beyond the ministry's own claim.

FAIR TO SAY

The Officers' House is a garrison cultural venue by origin and name, so Russia's claim is not inherently impossible. Tested against evidence it fails: no participant has been named; no Air Force officer or foreign national is among the dead or injured.

Ukrainian figures changed from 17 to 29 over a year, and agencies give different launch platforms and missile counts. No international body has published a case-specific legal finding; the case rests on Russia's admission and the Ukrainian investigation.

A PRECISION WEAPON AIMED AT A SQUARE FULL OF PEOPLE

Vinnytsia is the case of an admitted strike with a precision weapon on a civilian building in a city centre, justified after the fact by a meeting nobody can name. The law does not require Ukraine to prove the negative; it requires the attacker to have verified the target and to show what it was.

UKRAINE EVIDENCE HUB
VERIFIED RECORD
OCT 2026

ESTABLISHED — BY BODIES WITH A MANDATE

Russian MoD (15 Jul 2022): the strike, the weapon and the aim point admitted — a state admission usable in any forum.

UN Secretary-General (14 Jul 2022): at least 22 civilians killed including three children, more than 100 wounded; attacks on civilians and civilian infrastructure condemned; accountability demanded.

Ukrainian investigation (SBU 12 Jul 2023; PGO 2025): 29 killed, 154 injured; the order traced to the Black Sea Fleet commander.

PATTERN — WHAT THE RECORD SHOWS

Long-range strikes on cities far from the front in summer 2022 with an invented military target: Kremenchuk (27 Jun, 'hangars with Western weapons'), Vinnytsia (14 Jul, 'Air Force command meeting').

The Black Sea Fleet's Kalibr campaign: Vinnytsia (Jul 2022), Odesa, and the energy strikes of Oct 2022 – Mar 2023 for which the ICC has charged the fleet commander — the same launch platforms, the same chain of command.

POSITION — UKRAINE'S QUALIFICATION

Ukraine qualifies the strike as a violation of the laws and customs of war combined with premeditated murder, committed by a group of persons by prior conspiracy (Arts. 28(2), 438(2) CCU); Admiral Osipov notified of suspicion.

Ukraine holds that an admitted strike on a civilian cultural building in a city centre, without any verifiable military objective, is a deliberate attack on civilians and civilian objects (Rome Statute Art. 8(2)(b)(i)–(ii)) engaging responsibility up the naval chain of command (Art. 28).

THE RULES THAT APPLY

Additional Protocol I Art. 52(2)–(3): only military objectives may be attacked; in case of doubt, a building normally dedicated to civilian purposes is presumed civilian; Art. 57(2)(a) (i): everything feasible to verify the objective.

Rome Statute Art. 8(2)(b)(i), (ii), (iv); Art. 28: command responsibility. AP I Art. 12: medical units protected — the clinic was struck.

WHAT WE DO NOT KNOW

The launch platform — submarine, surface warship or small missile ship — and the number of missiles (three, four or five).

The identity of the ship's commander and of any officer between Osipov and the launch.

The final injured count (154 vs 202).

WHAT WE ASK

Put Vinnytsia on the UN record. Ask the Commission of Inquiry and HRMMU to document the 14 Jul 2022 strike specifically; the Secretary-General's statement of the day is the only UN text that names it.

Designate the fleet commander for this strike. List Admiral Igor Osipov under EU, US and Canadian regimes with Vinnytsia as a ground where not yet listed; the UK listing of 15 Mar 2022 is for the aggression generally.

Fix the launch platform. Share Black Sea naval tracking for 14 Jul 2022 with the Prosecutor General to identify the ship or submarine and its commander, and resolve the three Ukrainian accounts.

Quote the admission beside the names. Whenever Russia claims a military target in a city, pair 'the participants in the meeting were eliminated' with the list of the 29 dead — three of them children.
