B

Statement of the General Staff of the Armed Forces of Ukraine, a party to the conflict, published every morning; not independently verified. Personnel = killed, wounded, missing and captured, approximate.

C

Independent floors: Oryx lists only losses documented by a photo or video; Mediazona and BBC News Russian count only deaths confirmed by name. They are minimums, not totals, and are never added to the General Staff figure.

Grey bars: share of the General Staff figure confirmed by photo.

Why this is on an evidence record.

Military losses are not war crimes. They are recorded because they show the price Russia is prepared to pay — and that pressure on its supply and recruitment works.

WHAT WE ASK.

Russia replaces these losses with imported components and recruits from abroad. Enforce export controls on battlefield items, sanction third-country suppliers and recruitment networks, and keep Russia's immobilised reserves frozen until it pays.
